

Track N Trace®

Intelligent mailpiece delivery tracking, for smarter and more effective mailings.

For years, USPS® Confirm® mail tracking has provided an important service to efficiency-minded mailers. Now OneCode Confirm® and the Intelligent Mail® barcode offer even greater delivery-monitoring functionality. **Track N Trace®**, BCC's OneCode Confirm service, channels this new technology with unbeatable convenience, flexibility and economy.

With access fully integrated into BCC presorting software solutions, Track N Trace can be easily used with presorted First-Class™, Standard Mail® or Periodical mailings. The service assigns a unique ID for each mailpiece, and includes that data in the Intelligent Mail barcode that is printed directly on the address labels.

After your mailing drops, Track N Trace collects step-by-step delivery information from postal facilities on the pieces' delivery paths and maintains that data on a secure Web interface. Reports can be generated or downloaded at your convenience. Closely monitoring the progress of your mailings will help you gauge delivery effectiveness and predict future performance.

Tracking your jobs through the mailstream has never been so easy, so useful, or so affordable. All thanks to Track N Trace, from BCC Software.

Features and Benefits

- Uses USPS Intelligent Mail barcode to deliver end-to-end tracking of a job's path through the mailstream (OneCode ACS® capabilities coming soon)
- An express lane to the IM™ barcode—no need to apply for a USPS Mailer ID
- **NEW Performance Reports**, with advanced mapping and 3-digit ZIP specificity, provide enhanced reporting
- Credit-based pricing for easy budgeting (**NEW lower rates now available**)
- **NEW job automation** available through Mail Manager TaskMaster option
- Compatible with First-Class, Standard Mail and Periodicals
- Allows unique identification of every piece in a mailing, to provide delivery data with any user-desired specificity
- Report data archived and password-protected online; or downloadable into multiple file formats
- Available reseller option allows third-party branding of Track N Trace to end-user clients

Track N Trace: Cutting-edge mailpiece delivery monitoring made easy and affordable.

Track N Trace advanced online reporting provides easy access to the most updated delivery data available for your job—supplied by the USPS OneCode Confirm service, and archived on BCC's secure servers. New **Performance Reports** add even more functionality.

From the power to identify weak links in the delivery chain to the ability to predict mailstream patterns for future jobs, the information revealed by mailpiece tracking can improve your business—and the more specific your data, the better. BCC's **Track N Trace** service uses state-of-the-art USPS barcode technology to ensure the most comprehensive and up-to-date delivery details will be at your fingertips when you need them.

The Intelligent Mail barcode at the heart of the OneCode Confirm service allows deeper mailing penetration than PLANET Code® based Confirm tracking: by assigning a unique ID to each mailpiece, you can form real conclusions—not just assumptions—about the delivery of your jobs.

A powerful reporting function allows you to conveniently check up on the mailstream progress of any job, with updates posted multiple times each day to BCC's secure servers and archived for later use. A wide variety of download formats for your Track N Trace reports provides maximum presentation flexibility, as well.

With its intuitive interface built seamlessly into the Mail Manager Full Service workflow, using Track N Trace to enhance your mailings couldn't be easier. And with the Intelligent Mail barcode looming as an inevitable element in automation-compatible mailings, taking early advantage of its cutting-edge power gives you an important jump on the competition.

Why wait? Let Track N Trace give you unprecedented total control over your mailing efficiency. Only from BCC Software.

Track N Trace Reseller Option

Become a Track N Trace sublicensee with a **branded reseller site** that allows you to provide mail-tracking functionality directly to your own customers. Call for details.
