

Mail Manifesting Option

Variable mailings made simple—and affordable.

“The more things change, the more they stay the same”: if only that applied to mailings with pieces of variable weights and thicknesses. Without an easy way to reconcile such jobs with the automated USPS® manifest mailing system, any postal discounts those mailings might deserve will certainly change—and not for the better.

Enter Mail Manifesting from BCC Software. These premium options for Mail Manager™ organize and document your variable mailing jobs, ensuring streamlined production and proper postal discounts.

After Mail Manager presorts your list, these options generate Manifest Keylines on each piece and print a USPS-required Manifest Report. The results: a smoother trip through the postal system for your mailing, and optimal postage savings for you or your clients.

Don't let complex mailings upset your bottom line. Keep it simple with Mail Manifesting for Mail Manager. Only from BCC Software.

Features:

- Now USPS MAC™ Batch certified for First-Class™ letter jobs
- Generates appropriate documentation for mailpieces of different weights and thicknesses
- Maximizes access to postal discounts
- Streamlines mailpiece processing and production
- Eliminates need to batch-process variable-piece mailing jobs
