

Mail.dat

For high-efficiency mailing reports and a gate way to PostalOne!® convenience.

The USPS® *PostalOne!*® system eliminates the need for hard-copy postal forms, and the newly enhanced Mail.dat® option for BCC Mail Manager lets you take advantage of *PostalOne!* like never before.

The Mail.dat option for BCC Mail Manager—included with BCC Mail Manager Full Service—uses this industry-standard format to streamline USPS Qualification Reports into ultra-compact electronic data that replace traditional hard copy documentation—postal presort-created packages and containers, and more.

Transmittable via e-mail or disk, the files provide an easy *PostalOne!* gateway. And the new updating function dramatically increases mailing flexibility by allowing for last-minute changes in piece weight, job status details or appointment information. Mail Manager users can now submit the most up-to-date job details without having to use costly third-party Mail.dat packages.

Features and Benefits

- Updating feature provides greater job-detail accuracy with no additional software packages required
- Replaces cumbersome paper USPS reports
- Maintains consistent data file formats
- Easy connectivity to *PostalOne!* system
- Saves time, resources and money
- Supports First-Class™, Standard Mail®, Package Services and Periodicals

Your Full Service Solution
