

## Palletization

### More functionality than a forklift could carry.

Palletizing can be indispensable for high-volume mailings, but without robust pre-sorting capabilities, its value doesn't stack up. Add power to your pallets with BCC Software's Palletization options for Mail Manager.

Many providers offer one or two pallet-presort alternatives. Look to BCC for total Palletization solutions — support for First-Class Mail® pallets, plus comprehensive Tray-, Package-, and Sack-based Standard Mail® or Periodical sorts. No matter how your pieces are gathered for pallet-based shipments, these products let you handle them with ease — increasing your mailing efficiency, and saving you time and money.

Whether you need only one Palletization option or the complete suite, you'll know your mailings are arranged in an order that maximizes delivery speed, labor economy and transportation ease. Mailpieces even receive less handling, for improved condition when they reach their destination.

Combine pallets with profits. Choose the Palletization options with Mail Manager. Only from BCC Software.
